

I Recorded My Zoom, Now What???

Once you have ended the meeting, the video will automatically begin to convert.

The computer will ask you where you want to save the video. Select a location and save.

This is what you will see.

Every time a file is saved, 3 file types will appear. The one called Zoom is the one that includes audio and video. I right click on the file and name it something so I will know which video this is, like Multiplying Fractions, Section 1.

Now go to your Google Classroom.

Start a new assignment.

Click ADD – FILE

Browse and find the video.

Add any other details or information to the assignment.

Now click ASSIGN
